PREMIUM POSITIONING

PRECISE POSITIONING
FOR EVERYONE

HELLO!

Together with our partner CNH Industrial we offer a global RTK network with more than 2.000 base stations and coverage in more than 25 European countries.

What makes us stand out? Delivering high technological solutions in a simple and customized way. With the use of our enterprise account management tool, you are able to manage your RTK accounts fully independent. Next, our reliability, with an uptime of more than 99,998% in the last 3 years and European certified ETRF coordinates.

We would like to get in touch with you and discuss how our RTK Premium network could help you to get the most out of your business.

With kind regards,
Peter Gerritsen

Managing Director
Premium Positioning

OUR INDUSTRIES

SURVEYING

Enhance the efficiency of your surveying activities with our centimeter accurate positioning services. Our plug and play system will enable every GNSS rover to automatically connect to our RTK premium network via virtually any mobile internet connection.

MACHINE CONTROL

Nowadays almost all earthwork machineries are equipped with GNSS receivers. Our positioning services enable machine workers to integrate our centimeter correction services to control their machines.

AUTONOMOUS DRIVING

The positioning services of Premium Positioning will enable the automotive industry to incorporate digitalised centimeter corrections in their activities.

UAV

The industry of Unmanned Aerial Vehicles (UAV) exploded over the recent years and will continue to do so in the coming years. Safety and reliability are key essentials in this industry and for this reason many UAVs are equipped with advanced GNSS receivers.

MARINE

The positioning services of Premium Positioning will enable the marine industry to incorporate digitalised centimeter corrections in their activities.
